Jefferson, Lincoln, County  
U.S.G.S. North Whitefield, Maine (7½')

## Fishes

Smallmouth bass  
Largemouth bass  
White perch  
Yellow perch  
Chain pickerel  
Minnows  
Golden shiner

White sucker  
Hornpout (bullhead)  
Pumpkinseed sunfish  
American eel  
Sea-run alewife

## Physical Characteristics

Area - 423 acres

Maximum depth - 16 feet

Temperatures:

Surface - 70°F

16 feet - 68°F

Principal fishery: Smallmouth bass, largemouth bass

Dyer Long Pond provides excellent habitat for warmwater fish. Although some small smallmouth bass are found in this pond they are not abundant enough to provide good fishing. Largemouth bass have become established in recent years and should provide a good fishery.

Sea-run alewives utilize this pond for spawning and adequate provisions for fish passage should be provided in the small dam at the outlet.

Surveyed - August, 1941

Resurveyed - August, 1968
